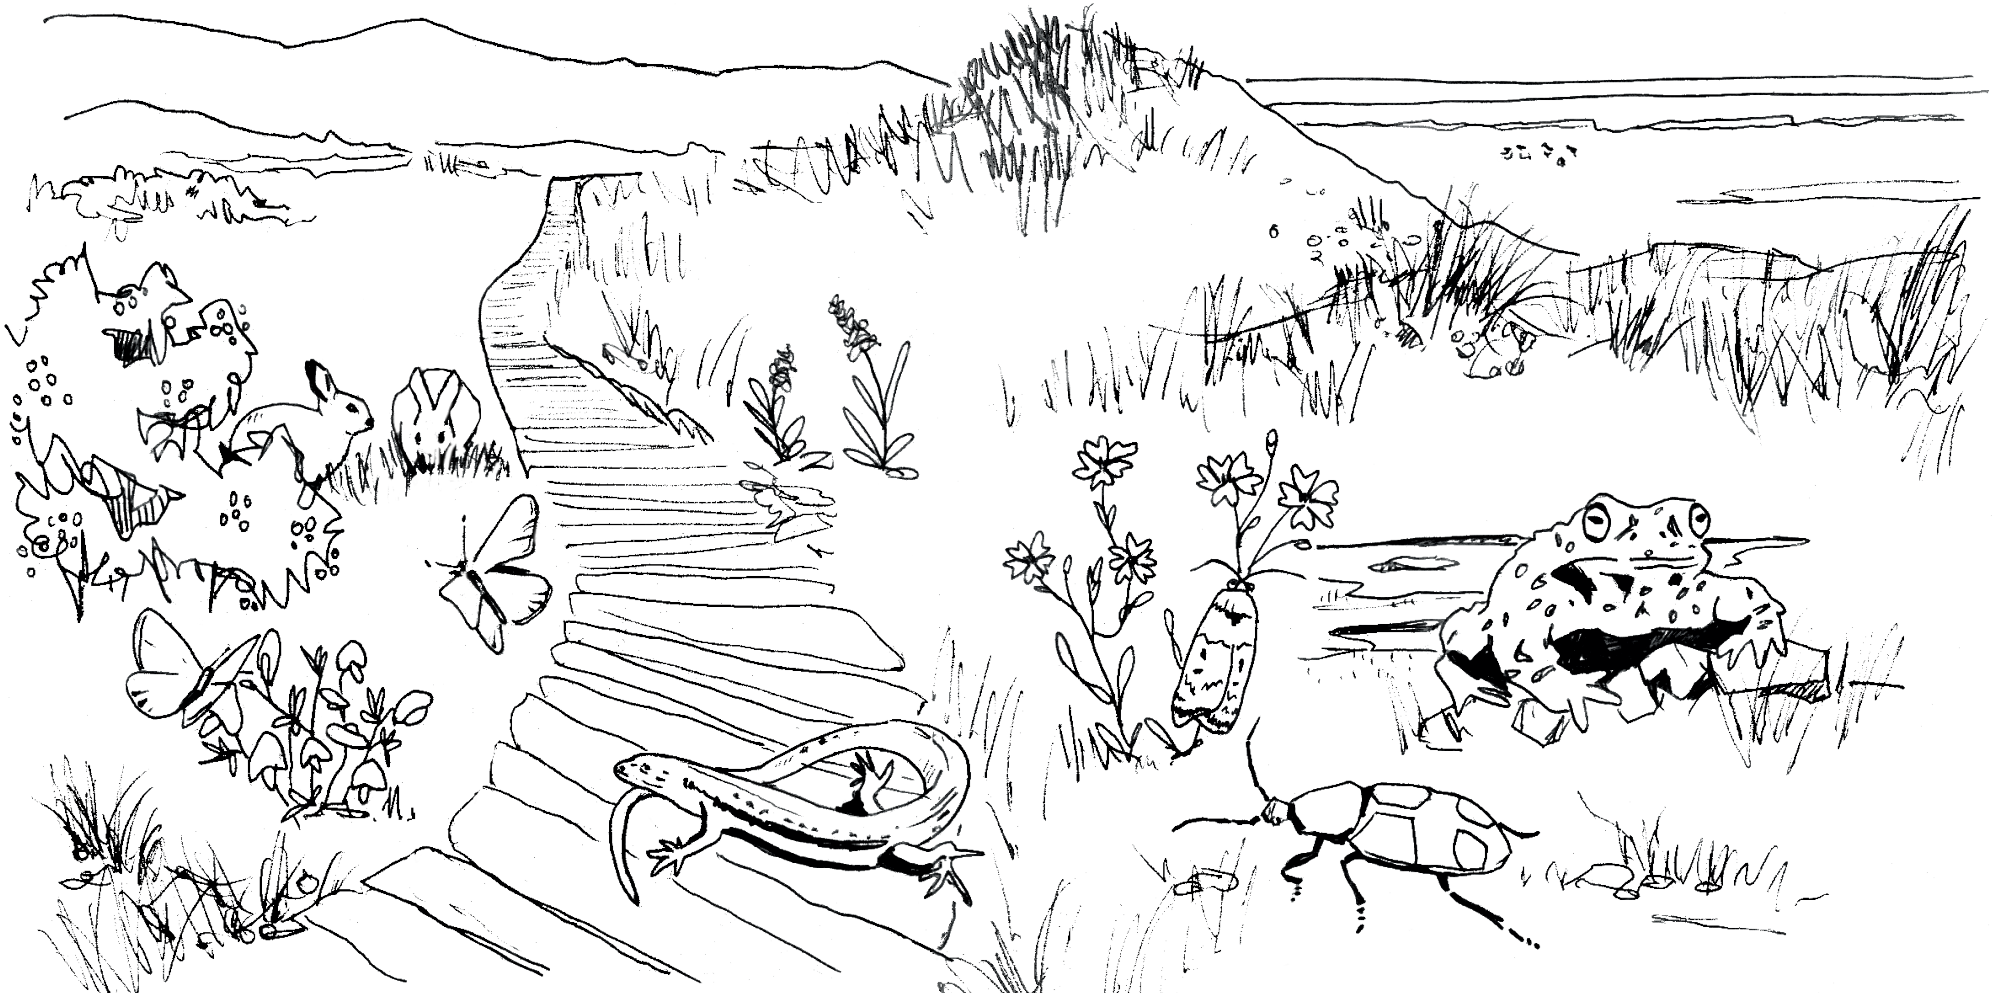
Did you know?

Sand dunes are great places to play, explore, and discover interesting wildlife - sunbathing lizards, wild rabbits and blue butterflies to name a few. Damp dune slacks are are also home to some of our rarest species: the natterjack toad, marsh moth and crucifix ground beetle.



DYNAMIC DUNESCAPES

Dynamic Dunescapes is a partnership project rejuvenating sand dunes across England and Wales, supported by the National Lottery Heritage Fund and the EU LIFE Programme. Partners are Natural England, Plantlife, Natural Resources Wales, National Trust and The Wildlife Trusts.

Did you know?

Grey seals have dense fur and a think layer of blubber to keep them warm in chilly waters. They are active carnivores and can weigh up to 400kg, over 6 times the average human! They love to sunbathe on rocks or sandy beaches, and from November can be seen with their fluffy white pups at places like Donna Nook.
